AIRCRAFT & OPERATIONAL STANDARDS

Vitesse owns and operates Hawker Beechcraft 800 XP and 850 XP, premium mid sized jet aircraft. These planes feature the latest and most sophisticated avionics packages on the market today. All pilots are trained extensively on each flight system, which includes Reduced Vertical Separation Minimums (RVSM), as well as the latest in terrain and aircraft avoidance systems.

At Vitesse, we operate all aircraft under the highest of operational standards, exceeding those required by the Federal Aviation Administration. All pilots are trained and type-certified in each aircraft operated by Vitesse Aviation.

All Vitesse aircraft are professionally maintained by our staff of licensed mechanics to standards above the manufacturer's recommendation. Maintenance & Flight personnel undergo regular recurrent training and are screened prior to employment.

Our flight planning department is constantly aware of weather conditions and developing weather patterns at your place of origination as well as your destination. In case of change in schedule due to weather, our staff will keep your family or business associates on the ground informed of any change in plans & make adjustments to your post-travel itinerary, as needed.

All Charter Flights are subject to Federal Excise Tax, Flight Segment Fees and Overnight Crew Charges, as applicable.
